

## Produce a bilingual video for a rural health clinic (Navajo/English)

Project Title	Produce a bilingual video for a rural health clinic (Navajo/English)
Project Summary	We need your technical expertise, creativity and artistic vision to produce a bilingual Navajo/English video to convey basic medical concepts about eye health and eye disease.
Country	United States
Agency	Indian Health Service
DoS Office	N/A
Post	N/A
Section	N/A
Number of Interns	2

## Project Description

Four Corners Regional Health Center is a rural health clinic in northeastern Arizona. Most of our patients are bilingual (Navajo/English), but some primarily communicate in Navajo. Explaining complex medical conditions is a challenge, but it is important that our patients understand their conditions in order to be engaged in their treatment decisions. We use Navajo translators but we give a lot of information at once and patients can't remember everything that we say. This project is for the optometry (eye) clinic. We would like a video that explains basic concepts of eye conditions and answers FAQs. We would like the content be simple, accurate, engaging and incorporate Navajo perspective on wellness and healing. Possible uses could include playing in our waiting area and sharing on social media.

## Desired Skills Interests

## Additional Information

-Knowledge of Navajo language & culture are welcome, but NOT required.

- Medical knowledge or science background NOT required
- We need your technical expertise, creativity and artistic vision

## **Language Requirements**

*None*
